Page 4

Version with Markings to Show Changes Made:

1. (Amended) An arrangement in a paper machine for measuring properties of a moving paper web having a predetermined width, which arrangement comprises:
measuring means for measuring properties of a paper web, and
[a] an unmoving plane-like support surface for supporting the paper web in connection with the measuring means, the plane-like support surface extending substantially over the whole width of the paper web in the cross-direction relative to the direction of travel of the paper web and defining at least one opening therein, the measuring means being arranged to measure properties of the paper web through the plane-like support surface through the opening.
